GE Healthcare

Performance CT Product Launches

RFP Response

Presented by VSA Partners

GE Healthcare CT is on the cusp of a big year.

The act of launching three new products will get people talking.

The fact of the products' technical innovation will signal a meaningful step forward for the business.

It's an opportunity to claim your rightful place atop the category as the leader in clinically relevant CT solutions.

VSA Partners is eager to help you do that.

But first, a thought on thought starters.

Your RFP asked us to explore how we might address the challenge at hand.

That's the sort of thing we'd typically arrive at after workshops, interviews, iteration, and close collaboration with you.

So what follows is a hypothesis. And while we think there's something to it, it would be presumptuous to put too much stock in it.

But, for the purpose of showing you how we think, we're going to see where it could take us.

Some early thoughts on how we might approach this:

Meaningful innovation is hard to come by.

Even when it *is* truly meaningful, it's often maligned.

As "copycat."

As "catch up."

As "late to the game."

And while there's always value in "new," it quickly fades when the conversation centers on innovation alone.

No one wins spec wars, and the battles are damaging.

So we need to change the conversation.

We need to elevate the dialog.

We need a bigger idea.

Your objectives for this work give us a potential direction:

1. Raise awareness.
In many ways this is the "easy" part for a market leader introducing three new products.

2. Inspire consideration.
You'll be in the hunt on most RFPs. This comes down to mid- and lower-funnel sales enablement.

3. Gain trust.
Now this is something special. It builds on your legacy and gives us a way to achieve Awareness and Consideration that's bigger than any innovation.

Trust is an emotional idea.

Trust requires risk. It demands vulnerability.

Trust takes time to build. You've got to prove you're worthy of it. You've got to earn belief.

And because of this, trust creates a more powerful bond than any fleeting stunt or new technology.

Brands that build trust...

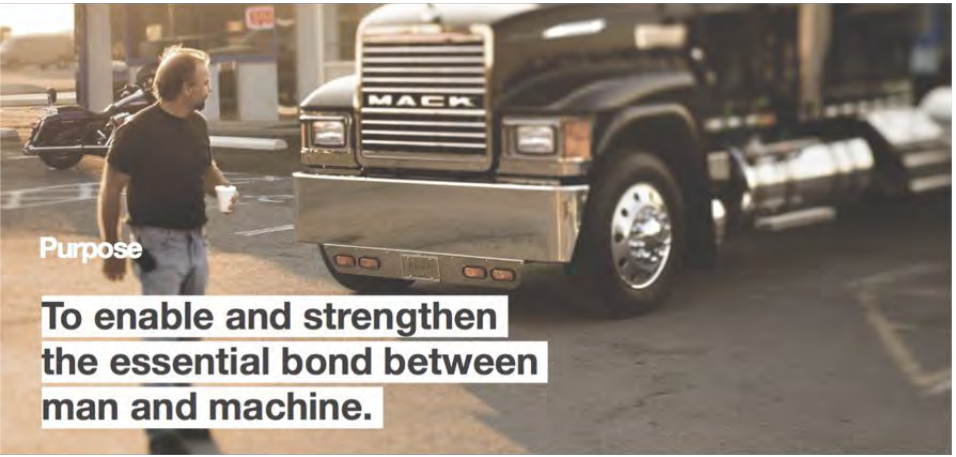
BRANDS THAT BUILD TRUST

Know their audience, intimately

Mack Trucks

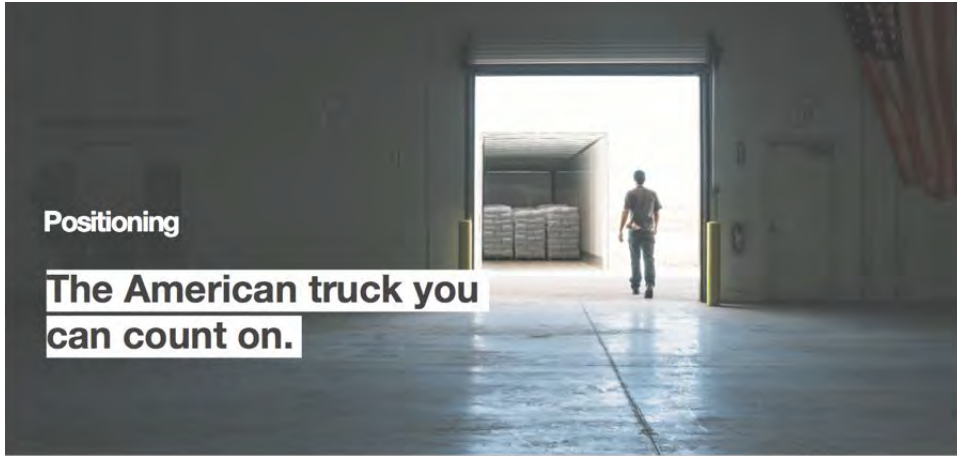
For years after its acquisition by Volvo, Mack had lost its connection with the people who rely on its equipment for their livelihood. As it prepared to introduce a set of new technologies, the company turned to VSA to help reform that relationship.

Through review of internal Mack research and our own digging, we aligned on a persona—the bareknuckle humanist—who embodied Mack's core user. This led to a messaging platform celebrating the essential bond between man and machine, and to Mack reclaiming its mantle as the leader in work-duty trucks.



Purpose

To enable and strengthen the essential bond between man and machine.



Positioning

The American truck you can count on.

Persona

THE BAREKNUCKLE HUMANIST

The term "bareknuckle" derives form the original form of boxing in which two individuals fought without gloves to protect their hands and nothing but their own bare, often bloody knuckles to soften their punches. Such

One who places high value on human experiences—a deal sealed with a handshake, a story handed down from one person to another, an object made by familiar hands. Often skeptical of dogma and ideology,

Essence

IN OUR PRESENCE—AS THE BAREKNUCKLE HUMANIST, EMBODYING THE AMERICAN SPIRIT—PEOPLE WILL FEEL:

COURAGEOUS

BRANDS THAT BUILD TRUST

Connect on multiple levels

GE Healthcare

Our work with GE Healthcare has spanned corporate advertising, brand expression, product launches, acquisition integration, cultural initiatives and sales enablement tools.

That varied context requires balancing the emotional with the technical. To be able to talk high-level benefits and technical features, seamlessly.

Through thoughtfulness of content, fidelity of design and consistency of voice, we've succeeded in creating credibility at each level individually, and all collectively.

GE Healthcare
imagination at work
healthymagination

A new standard
in clarity and dose
The high definition breakthrough.
Lower dose.
The leading edge of care.

The right capabilities.
The right experience.
The right investment.

Extremely versatile. Surprisingly clear.

What will be your
breakthrough?

What was once a difficult choice
has become an easy decision.

GE Healthcare

A new spectrum of diagnostic capabilities.

GEMSTONE™ SPECTRAL IMAGING

Characterization of a hemorrhagic lesion in the posterior fossa of the brain

CHALLENGE *The differentiation between an enhancing versus a hemorrhagic lesion is difficult to diagnose from an IV contrast-enhanced brain scan. A non-contrast acquisition is often required to confidently differentiate enhancement due to the contrast media versus a hemorrhagic event or lesion.*

CLINICAL VALUE

Gemstone Spectral Imaging provides unique CT images such as spectral (monochromatic or keV) and material decomposition images (MD) that provide incremental information to help problem solve anatomical information. For this case, it's important to note a pre-contrast acquisition was not obtained. Leveraging Gemstone Spectral Imaging information, differentiating hemorrhage versus enhancing lesion is possible with only the post IV contrast image data. The MD Iodine image confirms no IV contrast enhancement in the area of question. The lesion appears hyperdense on the MD Water image (also known as virtual non-contrast like image), which is evidence of blood density. The incremental information provided by these MD images suggest a hemorrhagic lesion avoiding an equivocal exam.

CT acquisition protocol

Scan type: Slice thickness Spacing: 0.625 mm	Coverage: 129 mm	Pitch: 0.6:1	ASiR-V (axial): 60%	Design kernel: Standard
	Rotation time: 0.5 seconds	Total X-ray exposure time: 1.63 seconds	kVp: 80 and 140	SFOV: 32 cm
				DFOV: 25 cm

Contrast protocols

With or without IV contrast: With (Fenestra)	Contrast injection rate: 3.5 ml/sec	Total contrast: without: 50 ml

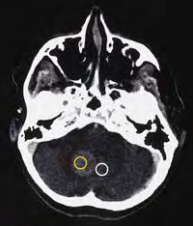


Figure 6a. Spectral 75 keV image.

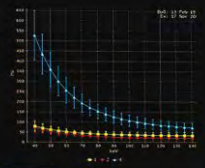

Figure 6b. Attenuation curves of hematoma (yellow) and cerebellum (red) compared with the blue curve showing iodine attenuation (vessel).

BRANDS THAT BUILD TRUST

Confidently claim their agenda

IBM

Smarter Planet is not only IBM's vision for technology and data worldwide, it's a business agenda that unites capabilities, employees and go-to-market strategies. It's also a branded platform that conditions the marketplace ahead of the C-suite sale.

VSA conceived, designed and executed the Smarter Planet expression system. By giving it a clear, robust set of tools for messaging and design, the system has enabled IBM to claim a trusted thought leader mantle across verticals and audiences.

Let's build a
smarter planet.

BRANDS THAT BUILD TRUST

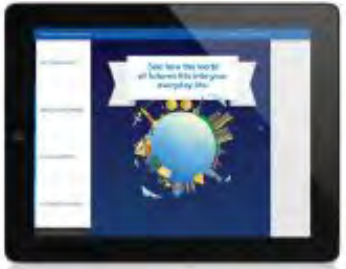
Create new pathways to transparency

CME Group

Following the merger of CBOT, NYMEX and CME, CME Group became one of the most influential financial institutions in the world, but also one of the most complex and least understood.

We helped build trust and clarity about CME through a curated ecosystem of content across multiple channels and audiences.

This includes digital channels that demystify futures and derivatives trading, and global events bringing together the world's foremost thinkers. The ongoing effort has helped to transform CME Group from being perceived as unsophisticated day traders to the preeminent global financial exchange.



Taking the actions that strengthen market integrity.

One thing brands that build trust don't do, however, is *say* they're trustworthy.

They need to show it.

Doing so requires a set of tools for demonstrating trust through an authentic, credible lens.

GE Healthcare CT will have to answer…

Where does trust come from?

Trust comes from **Humanity**

Trust is a social construct.

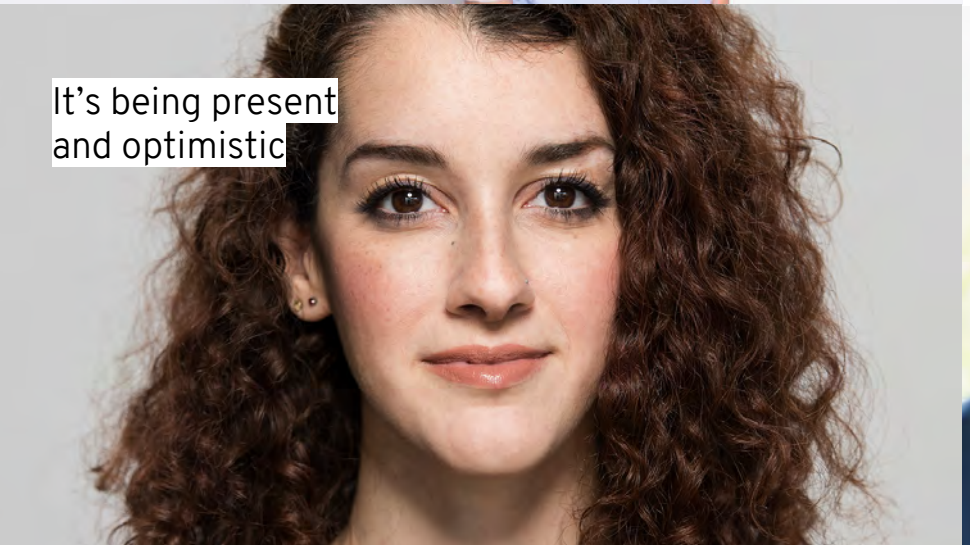
As social beings we're programmed to trust one another in a variety of ways.

We'll convey trust through tools that emphasize empathy, and connect us with the people we do this important work for.

It’s being authentic
and vulnerable

It’s the credibility
of our words

It’s being present
and optimistic



It’s moments of
connection

Engineer, Designer, Dreamer

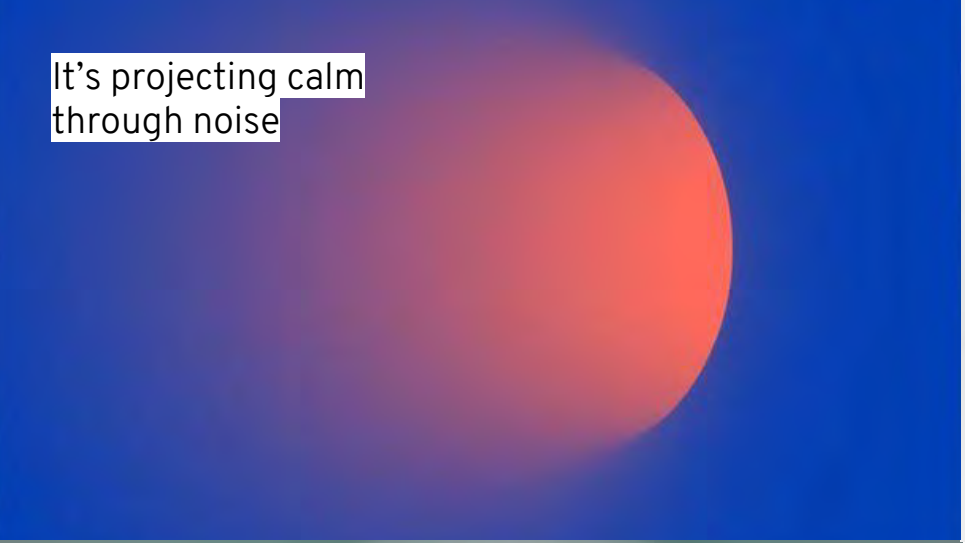
Exactly none of those things

Trust comes from **Clarity**

Clarity is a proxy for trust. We trust what we can see and comprehend.

(And for radiologists, clarity is the most important signifier of trust.)

We can convey trust through not only saying and showing “clarity” but also by speaking with it:
A direct and straightforward tone is clear. Candor and transparency build trust.



It’s projecting calm through noise

It’s precision

It’s valuing user needs

It’s the confidence of brevity
Gift Card

Personal standards for perfection tend to be defined in small dark rooms.

VSA PARTNERS, INC. CONFIDENTIAL

Trust comes from **Legacy**

Past is prologue. Trust comes from a history of proven performance.

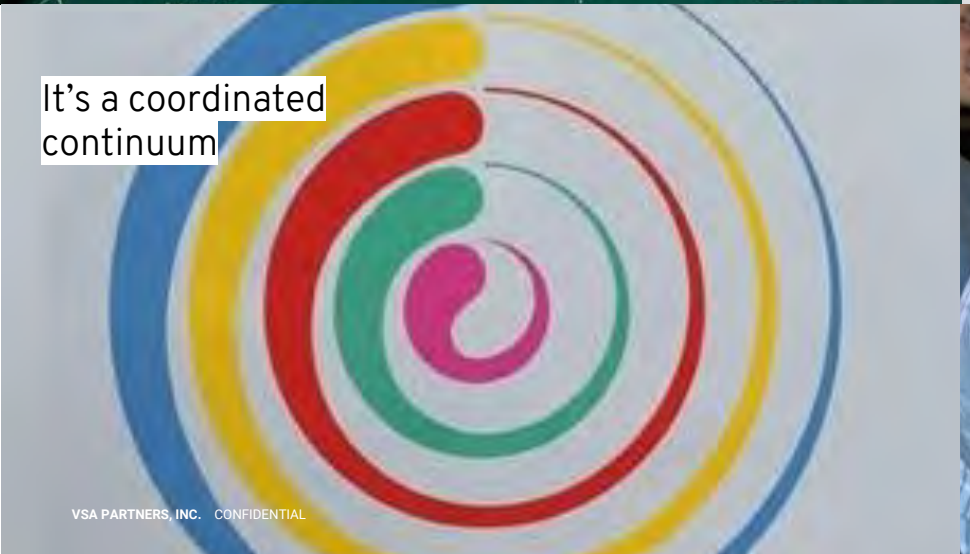
From inventing X-ray to taking on the world's biggest challenges, GE has a pretty compelling track record.

But the truly meaningful aspect of our legacy is the sense of purpose that underscores it: A relentless drive to use technological expertise to improve care.

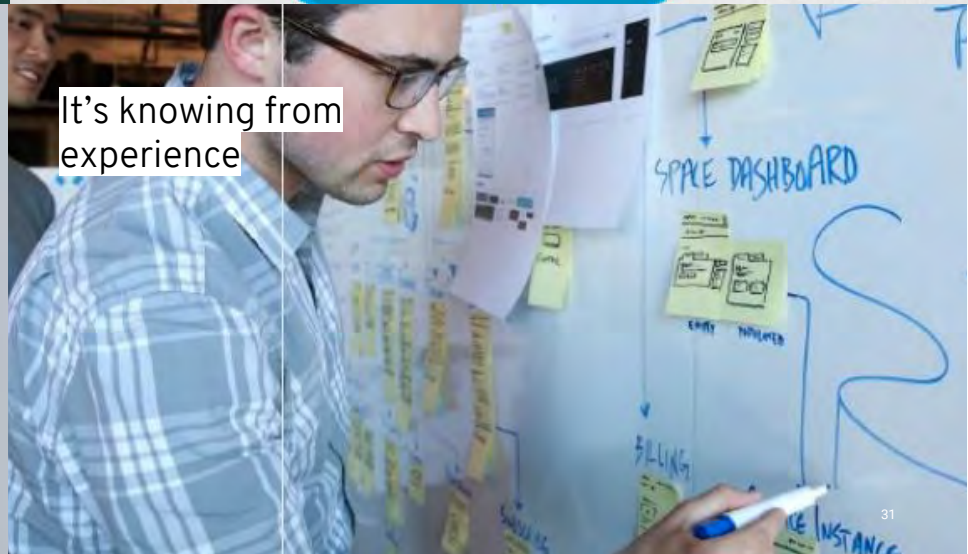
The proof is in a continuum of CT systems that continue to offer clinicians the balance of dose and image quality they need to create better outcomes.

It's proving value over time

It's the confidence of scale



It's a coordinated continuum



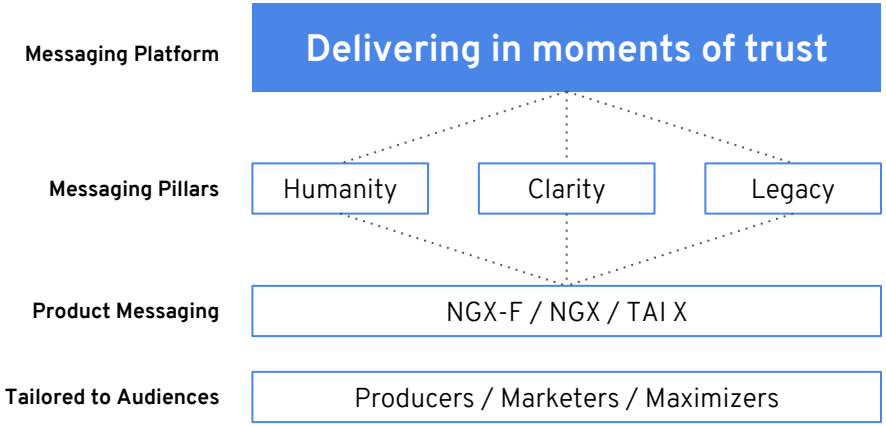
It's knowing from experience

When a 127-year-old company innovates like a startup

Putting it all together.

Ultimately we'll create a messaging toolbox of sorts. Within it are drawers to be opened depending on the situation, and drawers to be left closed for the sake of focus.

The tools themselves—the messaging elements—build a cohesive narrative at the portfolio and product level alike, customizable for distinct audience needs.



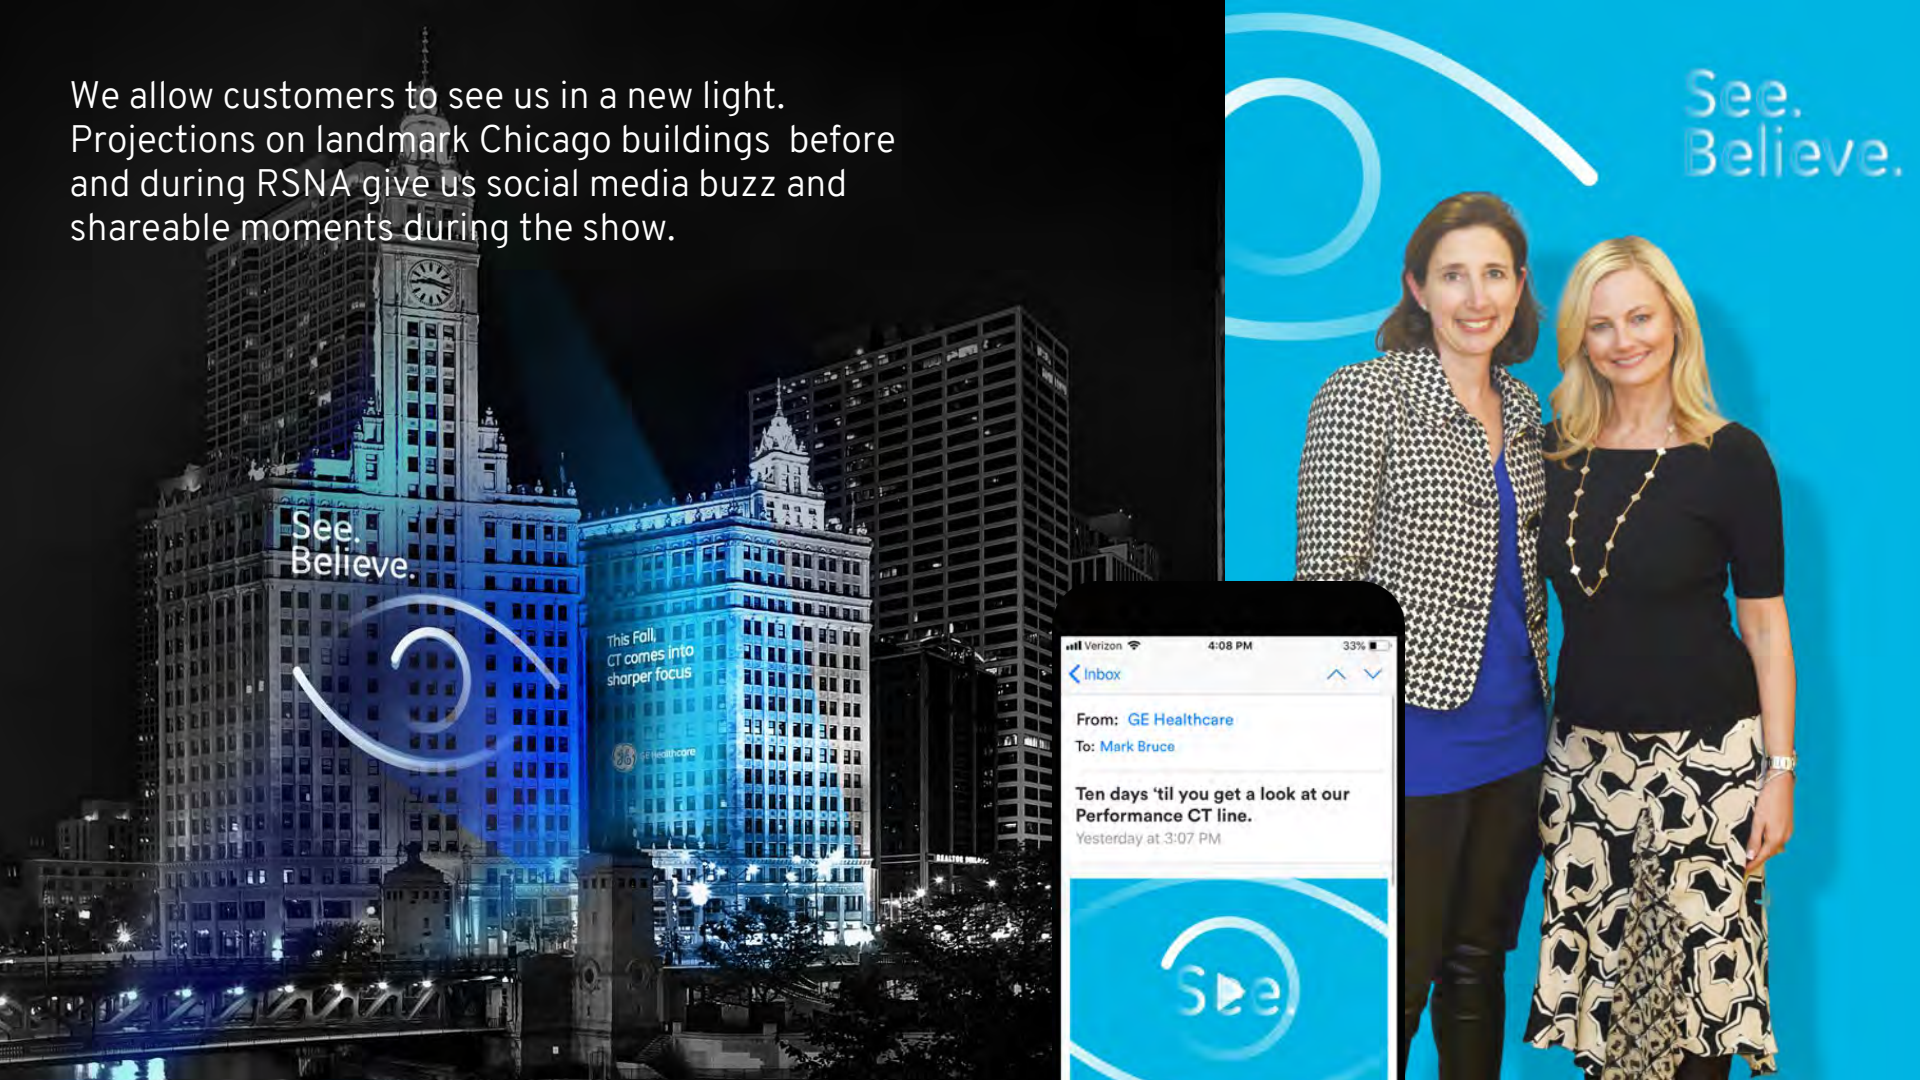
How do we activate trust?

We translate our messaging platform into external language that embodies our messaging pillars, and inspires our creative executions.

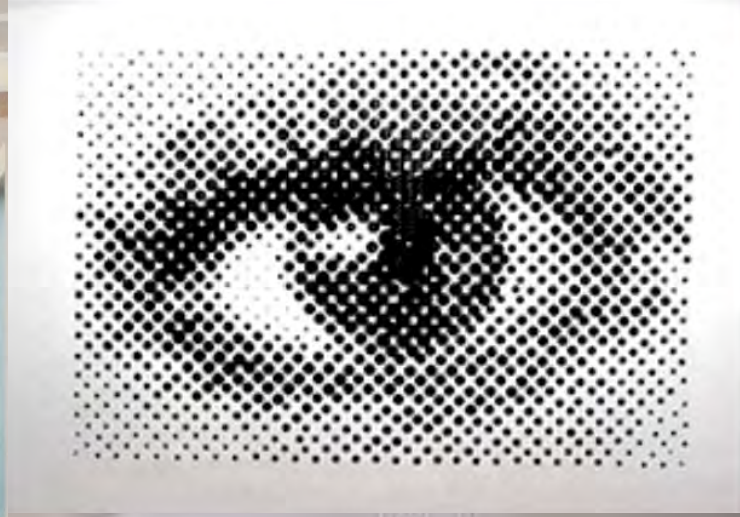
See. Believe.

We speak with the confidence of a leader. A print and digital teaser campaign conditions the market.

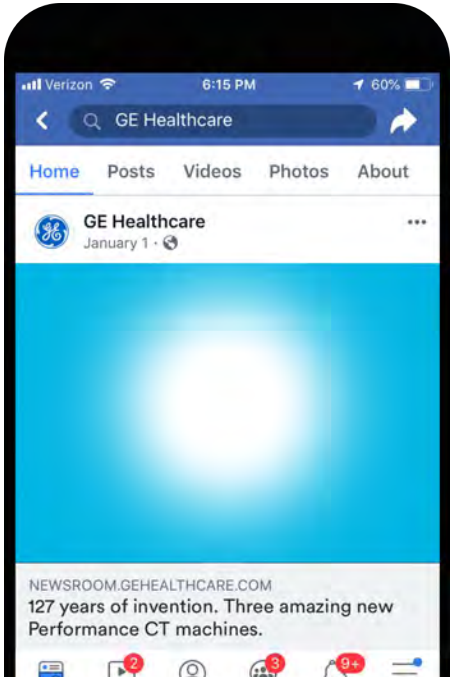
We allow customers to see us in a new light. Projections on landmark Chicago buildings before and during RSNA give us social media buzz and shareable moments during the show.



We visualize our technology. A three dimensional installation makes a stunning impact and carries our core message.



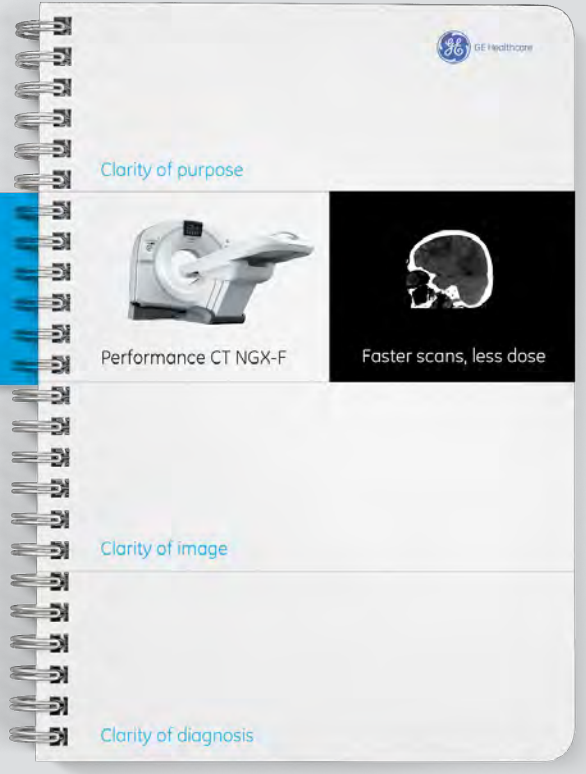
We link heritage to vision. Connecting posts to our continuum of innovation deepens our credibility.

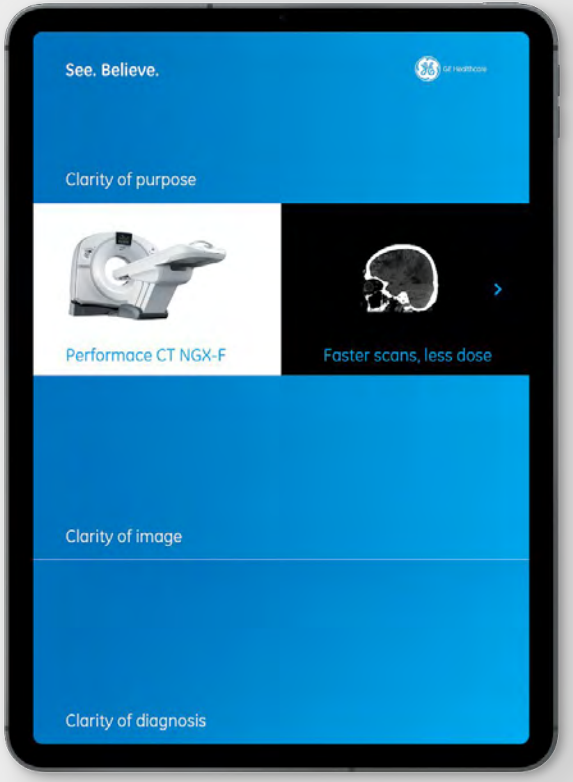


We let them see us as they choose. Interactive tools—in both print and digital—allow users to probe what interests them.

A robust toolkit of imaging modes at your fingertips for a streamlined, high-definition spectral imaging experience.

See. Believe.





We inspire and celebrate our colleagues. We'll create ambassadors through message-based schwag.

Process & Approach

Step 1

Discovery

Inputs and activities

The Discovery stage is intended to be efficient, reviewing your existing materials and augmenting them with our own legwork.

Our goal with this phase is to understand areas of strength, any potential gaps, and key ingredients from which to build compelling strategic messaging.

We'll focus on organizing inputs into a singular point of view about the position of the products, points of differentiation, and value prop.

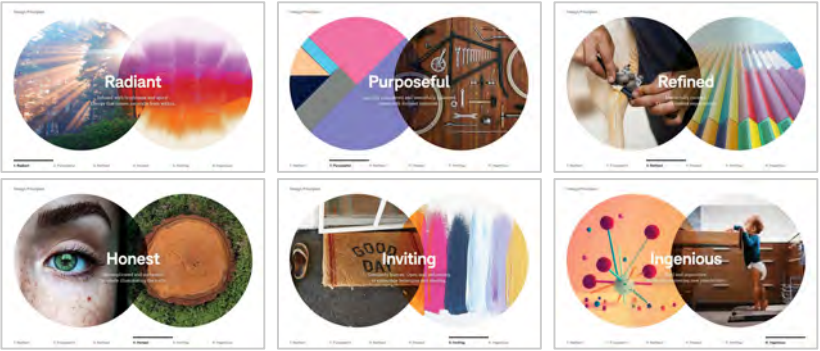
At the end of the Discovery, we'll share out a strategic document summarizing findings and implications and setting us up for future phases.

- Review/audit of existing research and background
- Internal and external in-depth interviews—across functions and customer types
- Stakeholder worksession to gain alignment and build advocacy
- Facilitated exercises—future casting, card sorts, metaphor elicitation, enemy definition

Timing: 3-4 weeks
Estimated Fees: $33,000

Step 2

Messaging Platform Development



Inputs and activities

In this phase VSA will build out the messaging platform and pillars that will ultimately shape the story across audiences.

In an iterative, exploratory process, VSA will use the inputs from Discovery to develop a shared messaging platform across the three Performance CT products, and articulate how it can be expressed to differentiate them from competition and one another.

+ Draft a range of 3-5 core creative ideas for the messaging platform including a title, rationale, and sample language that articulates the idea—and how it translates to each product
+ Consult with GE's research team on message testing research to understand what resonates and is compelling
+ Revise and refine per GE and research feedback to arrive at a single platform to carry forward

Timing: 4-5 weeks
Estimated Fees: $39,000

Step 3

Content and Design Ideation

VSA PARTNERS, INC. CONFIDENTIAL

Inputs and activities

Building on the agreed-upon messaging platform, we'll ideate on how to activate it.

We'll start with your list of deliverables and demonstrate the messaging platform in application to each.

We'll continue pushing the boundaries, however, bringing new ideas for how to execute against those deliverables, challenging assumptions and exploring breakthrough ideas for a holistic launch.

At the conclusion of this phase, we'll have the go-forward plan for production of all launch materials.

+ Establish an overall visual expression system
+ Design sketches and content for brochure, presentation, web site, sales enablement tools
+ Draft video scripts and keyframes to align to conceptual approaches and content
+ Concept exploration of launch events and launch support tool ecosystem and media opportunities
+ Develop production budgets and identify production partners, based on selected concepts

Timing: 4-6 weeks
Estimated Fees: $125,000

Step 4

Production and Activation

VSA PARTNERS, INC. CONFIDENTIAL

Inputs and activities

In this phase we'll take the raw materials from Ideation and polish them into finished pieces. Outlines become brochures, scripts become videos, templates are locked and sites are developed.

This phase is dependent upon the final concepts and deliverables, so we'll be able to add more specificity once those are finalized.

The broader media and launch plans will also impact this phase, particularly in how work is trafficked and delivered.

We'll work closely with you to ensure that final deliverables are specified and executed to meet your budget, at the highest possible fidelity.

+ Develop brochure(s) from draft through legal and regulatory approval
+ Shoot/animate/edit video content
+ Develop web page from draft through legal and regulatory approval
+ Finalize presentation templates, content and design of advertising, event and other elements
+ Traffic media assets

Timing: 8-10 weeks
Estimated Fees: Pending concepts/tactics
Estimated Production: Pending concepts/tactics

Prospective work plan

To the right is a high-level work plan for phases 1-3.

After the first kickoff with GE and VSA we will provide a detailed project plan complete with suggested review dates and times.

	3/18	3/25	4/1	4/8	4/15	4/22	4/29	5/6	5/13	5/20	5/27	6/3
Discovery												
Review/audit of existing research and background												
Internal and external in-depth interviews												
Stakeholder worksession and Facilitated exercises												
Messaging Platform Development												
Draft a range of 3-5 core creative ideas for the messaging platform												
Conduct primary message testing research												
Revise and refine per GE and research feedback												
Preliminary sketches, how the platform might come to life within GE's brand system												
Content and Design Ideation												
Establish an overall visual expression system												
Design sketches and content outlines												
Draft video scripts and keyframes												
Concept exploration of launch events and broader ecosystem												
Develop production budgets and identify production partners												

Estimated budget summary

The current budget and timelines take into account the first 3 phases of this project, as summarized to the right.

Because the messaging and ideation work streams will impact the concepts and tactics that will be produced, Phase 4 will be estimated once the deliverables' specifications are determined.

Phase 1 Discovery	$33,000
Phase 2 Messaging Platform Development	$39,000
Phase 3 Content and Design Ideation	$125,000
Phase 4 Production and Activations	TBD
Total	**$197,000**

P.S. If you're still reading, here's a little more about VSA

VSA is a strategy & design firm.

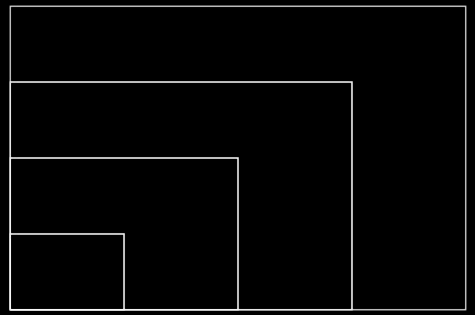
We’re dedicated to crafting brand-led enduring moments of impact across the customer experience.

We’re designers at the core.

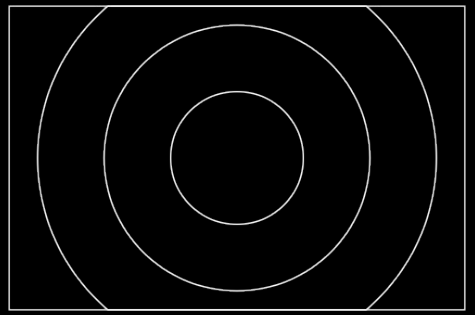
We craft brands through the lens of systems thinking and look at improving the parts that add up to the whole.

This creates meaning and value.

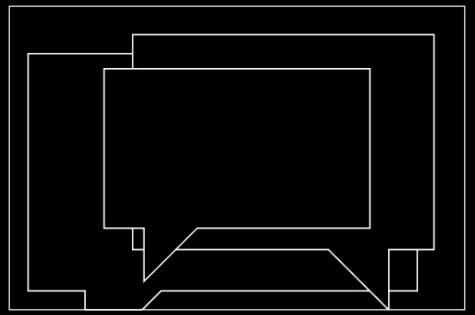
We believe meaningful brands:



Command a premium
through differentiation



Drive choice
through relevance



Create social capital
through WOM and loyalty

Behind every meaningful brand is a
compelling purpose that never waivers

Behind every meaningful brand is a compelling purpose that never waivers anchored to an enduring idea.

Behind every meaningful brand is a compelling purpose that never waivers anchored to an enduring idea.
And delivered through brand-led experiences that matter.

Business + Human + Brand + Experience

What we deliver

Brand & Business Strategy

We partner with leaders to envision and realize the future of their business.

- Envisioning the future
- Articulating a leadership agenda
- Architecting the business and brand systems
- Launch & implementation programs
- Facilitating change amongst the leaders and teams

Employee Transformation

We enable employees—and partners—to understand and work the vision.

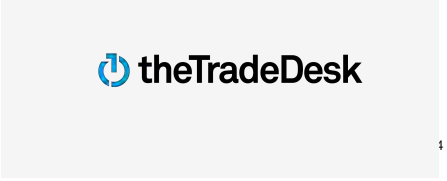
- Organization & cultural alignment
- Executive and employee communications
- Brand tools and experiences
- Corporate reporting and social responsibility
- Sales enablement

Customer Activation

We marry data science and creativity to deliver cross-channel experiences that drive change.

- Predictive analytics and measurement
- Websites and digital systems
- Advertising/mobile/social media
- CRM/direct/database marketing
- Sponsorships and events
- Media planning and buying
- Corporate reporting and social responsibility
- Public relations

Who we work with



Thank you.
